

How to use the PUBLEnEf - toolbox

The structure of the www.publenef-toolbox.eu tries to address the five main challenges detected during its design:

- The **complexity of the EE Directive**, comprising process dimensions, outcomes, and EE policy agenda;
- The **vast amount of resources compiled** (as of May 2017, nearly 200);
- The **variety of actors from different groups** that should serve;
- The **heterogeneous backgrounds of these actors**, from newcomers to experts;
- The **diverse challenges these actors face** in their daily work, and for which the Toolbox should offer an aid.

Structure of the PUBLEnEf-Toolbox: entry gates

Given this complexity and multiplicity of contents, users, and potential applications, the Platform www.publenef-toolbox.eu offers nine **entry gates**:

- **Home page**: offers a first contact with the contents of the Platform, and redirects users to the other entry gates;
- **MatchMakingwEEb** (very advance Search engine): **the focal point of the Platform**, actually a **very advance multi-criteria search engine** allows a detailed search and match needs expressed by user with Tools and resources of the Platform with multiple criteria and keywords;
- **Lear from Best Practices: for advance users** searching example of implementation of action plans and replication models;
- **How-To use this Platform guidelines**: help users understand how they can access resources of the Toolbox;
- **About PUBLEnEf project landing pages**: with short introduction to works done by the project consortium and redirection to the project website for those interested in project works;
- **EE themes landing pages**: provide a soft landing for newcomers, introducing EE Directive topics tailored to the group of actors that the user belongs;
- **Self-selection tools (surf of all tools collection)**: for advance user's own professional practice and expertise searching for specific tool by keywords;
- **News and Events**: offer training opportunities, resources for designing customized training, channels to access Community of Practice (blog, forum, events), and dissemination materials to advocate on EE for those more familiarized with this concept.
- **Ask Expert**: channels to access Community of Practice, community of registered users, experts ready to act as guide for user to find solutions at those need do not match with registered tools on this Platform

The top menu, always visible, provides a direct navigation route to all the entry gates.

The bottom section offer access to **Ask Expert** gate, **help and most recent Queries** and inform users on **legal and disclaimer**.

As a more customizable entry gate, users who do not need further guidance to navigate the Toolbox can access its full content through the MatchMakingwEEb (advance [search engine](#)) to find the resources they need. This engine has several functionalities to allow tailored-made searches:

- **Type of search** (looking for resources or users of the Community of Practice);
- **Basic search filters** (type of resource, stakeholder group, and policy agenda);
- **Advanced search filters** (level of expertise, EE challenge, language, and category within each type of resource);
- **Semantic search** (to introduce one or multiple keywords chosen by the user-or a simple description of his EE challenges);
